

COMPANY PROFILE

Established in 2003, AA Flooring has earned an outstanding reputation through its dedication to quality and service. With over 9 years of experience we are confident in our product.

Not only do we pride ourselves at being at the frontline of innovation, design & excellence when it comes to the installation of parquet flooring, our timber flooring range meets with the high level of standard of several of the country's leading designers, builders and architects on both commercial and residential projects.

We provide a full turnkey solution and offer the following services:

- Supply and Installation of Custom Parquet Flooring, Conventional Solid Strip Flooring, Engineered Flooring
- Custom Staircases, Balustrades
- Ceilings, Pergolas and Quality Timber Decking
- Various Customised Finishes, Including Varnishes, Oils, etc.
- Renovations and Repairs to Existing Floors.
- Maintenance and Care Plans

ECO-FRIENDLY FLOORING... OUR "GREEN" PHILOSOPHY

Need to replace your carpets or floors?

Choose materials that are safe for your health and the planet. Hardwood Floors are some of the best alternatives. For home-owners sold on traditional hardwood floors, the Forest Stewardship Council can make sure that your lumber comes from sustainably managed forests.

Dozens of types of wood are produced in FSC certified forests in which the trees are regenerated, biodiversity is conserved, and air and water quality are preserved.

As part of our green initiative we will source the finest woods available, thus helping to conserve forests through responsible wood use. Reclaimed timber is used for our custom flooring installations.
